

Driverless Cars

The **VENTURER** consortium is trialling autonomous vehicles in the Bristol and South Gloucestershire council areas to explore the feasibility of driverless cars in the UK.

The trial is being funded by Innovate UK to investigate the legal and insurance aspects of the new technology and explore how the public react to such vehicles.

Intelligent Mobility

Shaping the Future of Transportation

ATKINS

Get to city center
early for first meeting

Need to get across the
city for second meeting,
planner checks weather
and recommends best
travel option

Organiser recommends bus
as quickest mode of
transport. Clear map and
route is available and a
discount code for a coffee
on the way

At Atkins we harness the potential of Intelligent Mobility to impact and improve a wide range of social, economic and environmental outcomes. Our people bring together a wide range of experience and knowledge from across the industry which covers **five broad, strategic themes**:

- Mobility as a service
- Data Exploitation and Visualisation
- Journey Management
- Roads of the Future
- Security and Resilience
